

1. Air Quality

Escaped Project will not have any portions of its property that will emit fugitive dust. The parking area is grassed and there will be little traffic. No open dirt fields/roadways/storage piles will exist. No waste burning is allowed, only small campfires within the provided fire rings will be permitted. No construction of permanent buildings will take place, and no associated fumes will exist.

2. Wastewater and Recycled Water

No permanent sewer or running water will be installed. Portable toilets will be on-site with regular contracted maintenance scheduled.

3. Drinking Water

Bottled water will be supplied in limited amounts to tenants on the property. The nature of Escaped Project requires tenants to provide their own adequate water and will not be utilizing any public water supply systems.

4. Surface Water

Escaped will not disturb one or more acres of land initially or in the future. The site is not near a source of surface water and will not alter any streams or involve any filling or dredging.

5. Solid Waste

No trash or solid waste will be buried, burned, or disposed of on the site. Trash cans and trash service will be implemented to remove any waste. No hazardous waste will exist as part of this project.

6. Additional Notes – Storage Tanks

No underground or aboveground storage tanks will be used the site.
