

BOISE COUNTY

RESOLUTION # 2024-10

A BOISE COUNTY RESOLUTION TO ADVISE AGAINST USE OF GENETIC BIOLOGIC "VACCINE" PLATFORM TECHNOLOGY ON THE CHILD VACCINE SCHEDULE UNTIL FORENSICS INVESTIGATION, IDAHO HEALTH AUDIT, AND TRANSPARENT AND ACCURATE INFORMED CONSENT

WHEREAS, Idaho residents have been injured by Genetic Biologic "Vaccine" Platform technology making it more injurious than any other vaccine mechanism in US history with at least 30 deaths and 103 permanent disabilities, 33 cases of myocarditis in the State of Idaho, 2 of which are children 6-17 years old. The total US deaths are under-reported at over 18,000 deaths and Americans who were permanently disabled are over 17,000. According to VEARS, CDC total reports show over 36,000 deaths and over 67,000 permanently disabled individuals, and over 27,000 cases of myocarditis/pericarditis, since their release in 2021; and

WHEREAS, the mRNA genetic platform technology shots should be scrutinized and investigated due to the egregious number of adverse events, disabilities, and deaths to adults and children. Adversely affecting children in the womb, it increases rates of miscarriages, and adversely affects women's menstruation and fertility; and

WHEREAS, multiple labs demonstrate that both the Pfizer and Moderna's misbranding, and adulteration of consumer products, substandard products, and substandard and under-powered clinical trials may violate Consumer Product Protection statutes and informed consent as well as multiple other laws that regulate pharmaceutical safety in the State of Idaho; and

WHEREAS, the mRNA technology shots are adulterated with over a thousand times the allowable level of DNA from the DNA plasmids used to make the shots in E. coli bacteria. They represent up to 35% of the shot genetic material; and

WHEREAS, some of these shots have non-disclosed SV40 sequence promoters that allows them to infect human cells and go to the cell nucleus. SV40 is known to grow tumors and cause cancer; and

WHEREAS, due to adulteration, there is possibility of contamination with E. coli bacterial proteins and "endotoxins" and can cause auto immune reactions and sepsis in the recipients. The material in the shot was deigned to infect E. coli, such as present in the human gut. This can make the gut become a permanent spike protein factory through the E. coli that are naturally present; and

WHEREAS, the mRNA in the shots is also broken and degraded. Contamination and degradation of the mRNA genetic sequence can lead to changing out God given DNA, it can turn off genes that we need, like those that fight cancer, and these genetic changes can be passed on to our children. The material in genetic injections can shed through bodily secretions and transfect through fluids and contact, as well as through milk of a mother including cow's milk.

THEREFORE, Boise County, Idaho, declares that we value the health and lives of our children and recommend AGAINST any administration of the genetic "vaccines" or gene therapies, in any modality, to be administered to children under 18 in our County. We recommend they be removed from the child vaccine schedule in our County, and in the State of Idaho, until a forensics investigation and a health audit of Idaho can be administered by qualified agents, as well as until transparent and accurate informed consent can be given to parents and families; and

THEREFORE, Boise County, Idaho, supports legislation that investigates, or requires informed consent, that may recall, or may create corporate liability for products that use mRNA, DNA, or any genetic technology for human pharmacological use or consumption, use regarding any livestock, or use regarding any agricultural products that may adversely affect human health, animal health, or the food supply thereof; and

THEREFORE, Boise County, Idaho, supports The Idaho State Statute 18-3323 Bioweapons Law with the specific emphasis to section 18-3323 (4) (a, b, c, and d); and

THEREFORE, Boise County, Idaho, supports the definition of vaccines from Idaho Code 41-6002(8): "vaccine" means any preparations of killed microorganisms, living attenuated organisms, or living fully virulent organisms, which are approved by the Federal Food and Drug Administration, and recommended by the Federal Advisory Committee on immunization practices of the Center for Disease Control and Prevention; and

THEREFORE, Boise County, Idaho, supports legislation that requires informed consent, transparency, and labeling of any proposed product, including imported food supply or pharmacological products that use mRNA, DNA, LNP, or any genetic technology for human pharmacological use or food consumption, or use regarding any livestock or agricultural products; and

THEREFORE, Boise County of Idaho supports legislation that prohibits mandates, local, state, national, or global, regarding forced medical procedures or vaccinations in any modality; and

THEREFORE, Boise County of Idaho supports life affirming legislation and laws and declare that Idaho adults and children, including the unborn, have the right to normal cell growth; and

BOISE COUNTY BOARD OF COMMISSIONERS

Steven M. Twilegar, Chairman

Clay S. Tucker, Commissioner

Lindy E. Lindstrom, Commissioner

Attest:

Mary T. Prisco, Clerk to the Board
